

Exercise A

Write a **program**, which adds the **2 numbers** „3“ and „25“, and stores the **result in memory cell** „D0“.

Exercise B

Write a **program** for the virtual machine, in which you use the **ASCII Table** in order to output the

words: **Hello World!**

Exercise C

Write a **program**, which **alternates** (every 500ms) between the following addresses

B6	B7	B8
C6	C7	C8
D6	D7	D8

filling the current address with „FF“. The value should wander clockwise from cell to cell, so that in the Memory Usage Screen a small **animation** can be seen!

USW.

The program should have a loop which restarts at the beginning at its end.
